AGENCY INTEREST: 69

ACTIVITY: APE20070001

SOURCE DESCRIPTION:

The Dickerson Lumber Company Inc. applied to the Kentucky Division for Air Quality on June 15, 2007, to construct and operate a lumber company in Burkesville Road in Glasgow, KY. The source currently has operating permit (O-84-224), which is general Saw Mills and planing mills. The facility processes round oak logs into pallets and rough lumber. The manufacturing process consists of sawing, edging, notching, kiln drying, and pallet construction for the consumer. Particulate material emissions generated from the various machining equipment are collected into one of two cyclones and loaded into trailers for sale. Wood waste not sold is used to fuel the on-site wood waste boiler that serves the dry kiln operation. A scragg mill rated at 5000 board feet/hour (10 Tons/hour), constructed in January 2007, is being added to the permitted units for the source.

PUBLIC AND U.S. EPA REVIEW:

On September 6, 2007, the public notice on availability of the draft permit and supporting material for comments by persons affected by the plant was published in the Daily Times in Glasgow, Kentucky. In addition, notification of the issuance of the draft permit was sent to the U.S. EPA on September 7, 2006 via e-mail. The public comment period expired 30 days from the date of publication. No comments were received during this period. The permit is now being issued final.
